

## DEPARTMENT OF GENERAL PRACTITIONER TRAINING # 2

**Head of the Department: Candidate of Medical Sciences, Associate professor: Ergasheva Zumradhon Abdukayumovna**

**Working hours: 8.00 - 16.00**

**Contacts: +998 90 571 66 88 zumrad.ergasheva@inbox.ru**

**The department is located in Andijan Regional Multidisciplinary Medical Center**

### **History of the department**

The Department was founded in 1996. Until 2011 it was headed by Professor Nematjon Saliyevich Mamasoliyev. Under his leadership the Department acquired one of the leading positions in General Practitioners of the country and first foundations of further perspectives were laid. Constant effort was made in order to reach European standards of education and to implement “Educational triangle” in nurturing our future specialists. Distinct “School of Professor N. S. Mamasoliyev” was established. Members of “UMR” (“LIFE”) student circle, which was organized in the Department, and of scientific student societies participated and managed to take leading places in Republican scientific Olympiads. Some of them were also awarded with “President” and “Ibn Sino” scholarships. Within Regional Society of Physicians and Board of “Prevention of non-infectious inner and cardiologic diseases” the Department managed to nurture numerous apprentices. The Departments specializes in research theme of “Epidemiological challenges of non-infectious cardiovascular diseases”. In this period research fellows of the Department successfully defended doctoral (M.M.Mirsaydullaev, H.H. Tursunov, Raimjonov U) and candidate (Turgunov O.T., Niyozo’v Z.M. Ibragimova N, D.M.Kalandarov, Holdarova G.B, Sodiqova D.T, Nizomova S, Kurbonova R.R.lar) dissertations. From 2011 to 2019 the Department was headed by associate professor D.M.Kalandarov. During these years the Department achieved numerous results. In 2014 under his scientific leadership student of 717<sup>th</sup> group of Therapeutics faculty Rahimberdiyev Shohruh Ravshanbekovich was awarded “President” scholarship for his work titled “Pharmacoepidemiology of essential hypertension”. Despite his age the head of the Department worked honestly and selflessly for the Institute and the team.

Since 2019 associate professor Ergasheva Zumradhon Abdukayumovna is heading the department. Currently associate professors Jo’raboev B.N., Sodiqova D.T., Qutliqova G.M., Yuldasheva G.B. and assistants Hudoyarova N.K., Abdulhaeva Z.A., Urmanova A.Sh., Bustanov Sh.Y. are actively working in the Department. More than 200 scientific works were produced by department researchers. 20 gifted students also participate in department activities and in “Iste’dod”

(“Talent”) scientific school. Fellows of the Department also perform therapeutic and consultative work in gastroenterology, cardiology, rheumatology and pulmonology departments of Andijan Regional Multidisciplinary Medical Center as well as Outpatient clinic #5. Additionally they participate in monthly “Health weeks” and other measures in strengthening population health in accordance with Presidential executive order PK 2120.

Among the aims of the Department are intensification of international cooperation, modernization of educational activities, realization of scientific grant projects, meeting economical responsibilities, improvement of technical basis of the Department, creation of textbooks, manuals, methodological directives and recommendations for students and doctors, contribute in progress of Inner medicine and Cardiology, and production of competent specialists.

### **List of professors and other academic employees of the Department**

	<b>Name, Surname</b>	<b>Scientific degree and occupation</b>
<b>1.</b>	<b>Ergasheva Zumradhon Abdukayumovna</b>	Head of the Department
<b>2.</b>	<b>Jo‘raboev Baxtiyor Normatovich</b>	Associate professor
<b>3.</b>	<b>Yuldasheva Gulnora Baxtyarovna</b>	Associate professor
<b>4.</b>	<b>Kutlikova Go‘zal Maxamadjonovna</b>	Associate professor
<b>5.</b>	<b>Sodikova Dilrabo Tojidinovna</b>	Associate professor
<b>6.</b>	<b>Xudoyarova Nazokat Kaxarovna</b>	Assistant
<b>7.</b>	<b>Abdilxayeva Zuhra Adxamjonovna</b>	Assistant
<b>8.</b>	<b>Urmanova Alfiya Shamilyevna</b>	Assistant
<b>9.</b>	<b>Bustanov Sherzodbek Yakubovich</b>	Assistant
<b>10.</b>	<b>Abdusattarov Adahamjon Alisherovich</b>	Assistant
<b>11.</b>	<b>Rahimov Hikmatullo Husanboyevich</b>	Assistant
<b>12.</b>	<b>Kasimova Nihola Kadirovna</b>	Assistant

### **Subjects taught in the Department Bachelor’s Degree**

Inner diseases – to the 6<sup>th</sup> year students of therapeutic medical-pedagogic faculties

Hospital inner diseases – to the 6<sup>th</sup> year students

Clinic laboratory work – to the 6<sup>th</sup> year students of therapeutic medical-pedagogic faculties

Clinic allergology – to the 6<sup>th</sup> year students of therapeutic medical-pedagogic faculties and to the 3<sup>rd</sup> year students of dentistry faculty

Clinic laboratory diagnostics – to the 3<sup>rd</sup> year students of therapeutic medical-pedagogic faculties

The Department possesses library equipped with modern medical textbooks in Uzbek and Russian languages for the students’ use, laboratory equipment used in primary level, and a GP room, where patients can be admitted.

Teaching is conducted using lectures in presentation form, laboratory and instrumental methods available in the primary level and dummies.

### **Morning conference**

During seminars problem based teaching and other modern pedagogic methods such as educational games are used. Students hone their skills with dummies and models in possession of practical skills laboratory of Andijan State Medical Institute (ASMI) as well as clinical laboratory of Andijan Regional Multidisciplinary Medical Center.

### **ACTIVITIES OF THE DEPARTMENT**

Among the aims of the Department are intensification of international cooperation, modernization of educational activities, realization of scientific grant projects, meeting economical responsibilities, improvement of technical basis of the Department, creation of textbooks, manuals, methodological directives and recommendations for students and doctors, contribute in progress of Inner medicine and Cardiology, and production of competent specialists.

**Research directions of the Department:** Actual and pressing global health problems, such as Epidemiology and prevention of chronic, non-infectious diseases, including cardiovascular, ecologic medicine, climate related pathology, development, course, outcomes, treatment and prevention of various inner diseases.

More than 100 scientific articles and theses were published in local and foreign publications.

Books, manuals and recommendations published by the Department

<b>№</b>	<b>Name, Surname</b>	<b>Name and type of the publication</b>	<b>Ministry or council, that recommended the publication, date and registration number of recommendation</b>
1.	Kalandarov D.M.	Specific characteristics of respiratory diseases in teenagers, elderly and pregnant. Manual	Ministry of High and Secondary education of Republic of Uzbekistan. August 21, 2015 order # “303”. Registration number 303104
2	Kalandarov D.M.	Clinical skills of general practitioner. Manual	Ministry of High and Secondary education of Republic of Uzbekistan. August 21, 2015 order # “303”. Registration number 303102
2.	Kalandarov D.M.	Interpretation and evaluation of paraclinic investigations in diagnosis of inner diseases. Manual	Ministry of High and Secondary education of Republic of Uzbekistan. August 21, 2015 order # “303”. Registration number 303103
3.	Mamasoliev N.S. Qalandarov D.M. Jo‘raboiev B.N.	“Bronchial asthma and chronic obstructive pulmonary disease”	ASMI
4.	Kalandarov D.M. Sodikova D.T. Kutlikova G.M.	“Hypolipidemic and hypocoagulant drugs: characteristic features of studying specific and toxic qualities”	ASMI

**Notable achievements of members of the Department:**

They have implemented new pedagogic technologies into educational process, and have earned respect of the team and students. They participate in numerous measures of Ministry of Healthcare to improve therapeutic service, creation of healthy family and health of child-bearing age women. They regularly and actively take part in discussion and evaluation of dissertations, textbooks and monographs countrywide. The Department has considerable experience in widening international cooperation and in realization of grant scientific projects. They contributed in education of new scientific cadres. Their regular activities include coaching future practitioners for primary healthcare organizations of the Fergana valley.

18 gifted students also participate in department activities and in “Umr” (“Life”) scientific school

**The department has electronic library which consists of more than 5000 scientific resources.** Pedagogues and students use them effectively and in their independent work.
