In accordance with the Decree of the President of the Republic of Uzbekistan-2909, in order to attract foreign teachers to the educational process, an agreement was signed with DOLEA EDWARD IGOROVICH, associate professor of the department of therapeutic dentistry at Kharkiv National Medical University.

SCIENTIFIC DIRECTIONS OF THE DEPARTMENT

Based on the main content, scientific research is carried out in the following areas:

1. Oral hygiene in children
2. Description and treatment of congenital malformations in children.
3. Features of acute herpetic stomatitis and its treatment.
4. Dental manifestations of specific etiological factors in the Andijan region.

MAIN SCIENTIFIC ACHIEVEMENTS OF THE DEPARTMENT

With articles and abstracts participated in scientific, practical conferences of the republican, regional and institutional levels. He has published over 100 scientific articles and dissertations.

DEPARTMENT TEACHER-STUDENT SYSTEM

At the department we have scientific circles in each discipline. There is a teacher-student system for each subject. This includes the goal of qualified teachers to share their many years of experience with young professionals, including teaching them how to write dissertations and articles in their specialty. Every year, students of the departments of the department actively participate in national and republican Olympiads in science and achieve high results. Significant work was done by the teachers of the department on the basis of the Charter and the plan of work with gifted students. In particular, the scientific club "Young Dentists" was created at the department, the head of which is the head of the department Z.K. Khakimova, senior teacher F. Rakhmonova, assistants to Kh.X. Okhunzhonova, I. Ya. Sadikova. carried out work on the basis of the approved plan.

EDUCATIONAL AND METHODOLOGICAL WORK OF THE DEPARTMENT

Today, in accordance with the requirements of modern education, the department uses advanced pedagogical technologies to increase the effectiveness of the subjects taught. The teachers working at the department try to organize training at a high level and effectively use modern educational technologies. Practical lessons use such interactive methods as "Brainstorming", "Snowball", "Chain",

"Sinkway", "Cluster", "Fish skeleton", "T-system", SWOT analysis. The task of education today is to teach students to work independently in a growing information and educational environment, to use information flows competently. Thus, in the classroom, students are provided with opportunities and conditions for independent work and independent thinking. The introduction of pedagogical technologies into the educational process takes into account the age characteristics of students, their ability to learn and assimilate them. The teachers of the department published 4 textbooks, more than 50 teaching aids.
