

ASMI OTORINOLARINOLOGY

INFORMATION ABOUT THE HISTORY OF THE DEPARTMENT.

Head of the Department,

Doctor of Medical Sciences,

Professor Kasimov Kobil Kosimovich

Tel: + 99890 217-32-52

E-mail: qosimovqobil1949@mail.ru

The Department of Otorhinolaryngology was founded on September 1, 1958. Initially, the department was located as part of the ENT department on the basis of the regional clinical hospital. In 1973, the ASMI clinic was transferred to the ENT department.

The first head of the department was Professor M.S. Lure. Avrukina R.I., Arutyunova E.A., Petrashevskaya Z.D. were accepted to the department as assistants. From 1960 to 1968, the department was headed by Associate Professor S.M. Gordienko. In those years, assistants M.A. Rasulov and Boltaboev F.B. were hired. From 1968 to 2007, Professor A.I. Alimov worked as the head of the department. In those years, assistant K.K. Salikhova, candidate of medical sciences, associate professor Z.D. Konstantinova, Candidate of Medical Sciences, Associate Professor Boltaboev F.B., Candidate of Medical Sciences, Associate Professor K.P. Norboev, Doctor of Medical Sciences K.K. Kosimov, assistant M.M. Yusupov, associate professor Z.K. Norboev and assistant Gainulina Z.A. were employed at the department.

From 2007 to the present, the Department of Otorhinolaryngology is headed by Doctor of Medicine Professor K.K. Kosimov. To date, he has published 3 monographs, 5 textbooks and more

than 100 scientific articles. Under the guidance of Professor K.K. Kosimov - Orziev S.Kh. and M. Abdunazarov defended their scientific work.

At present, the department is working on Professor Kasimov K.K., Associate Professor Norboev K.P., Associate Professor Norboev Z.K., assistants Usmanova N.A., Tadjibaev A.A., Rakhimov S.K., Khusanov Sh.R., A.O. Ulmasov, H. Saliohunova, B.B. Ulmasov, U. Abdumutallipov, Sh. Mamasolieva and the head of the cabinet N. Umarov.

Educational and methodological activities of the department: All classrooms of the department are equipped with the necessary equipment and computers for ENT practice. In addition, two classrooms are adapted to the requirements of teaching in English. The above conditions are in working order and are widely used in practical training. In addition, surgical procedures are broadcast live via a teleconference, and students have the opportunity to answer various questions while standing in the operating room. There is a library for schoolchildren with textbooks in Uzbek, English and Russian. The student scientific society is active at the department, and students become winners of international olympiads.

Scientific work of the department: The department conducts research on the following issues. "Physiology, pathology and problems of the upper respiratory tract and auditory organ." On these topics, 8 candidates of medical sciences and 1 doctor of medical sciences were trained.

In 1967 A.I.Alimov defended his thesis on "The role of allergies in some types of nonspecific laryngitis", and in 1977 - his doctoral dissertation on "Chronic hypertrophic laryngitis" (etiopathogenesis, clinical picture, diagnosis). (Scientific adviser prof. Dainyak LB, "Moscow").

In 1980 Kosimov K.K.defended his thesis on "Mycosis of the oral cavity and clinic, diagnosis, treatment" (supervisor, prof. Dainyak LB, Kunelskaya). In 1990, K. Kosimov defended his doctoral dissertation on the topic "Clinic, diagnosis and treatment of sinusitis in hot regions."

In 1968, the assistant R.I. Avrukina defended her Ph.D. thesis "Features and diseases of the histological structure of the nasal mucosa in children" (supervisor G. N. Alexandrov, "Samarkand").

In 1972, Konstantinova Z.D.defended her Ph.D. thesis on the topic "Morphological changes in the ear canal in a newborn and fetus as a result of inflammatory diseases of the middle ear" (supervisor prof. Alexandrov G. N. "Samarkand").

In 1972, K.P. Norboev defended his Ph.D. thesis on "Organization of emergency care for diseases of the ear, throat, nose and injuries." (Scientific adviser prof. Kuznetsov VS "Moscow").

In 1974 Danilova R.D. defended her Ph.D. thesis on "Fungal lesions of the middle ear in the cities of the Fergana Valley". (Scientific adviser prof. Dainyak LB "Moscow").

Boltaboev F.B. defended his Ph.D. thesis on "Condition of hearing analyzers and prevention of occupational deafness in cotton pickers" (scientific advisers AI Alimov, AA Rozikov, KD Mirazizov, "Tashkent", 1980).

Scientific researchers:

M. Isakbayev conducted a scientific research on the topic "Clinic, treatment, prevention of upper respiratory tract diseases in hot regions." (Scientific adviser prof. Alimov A.I.)

Khaitov R.Kh. conducted scientific research on the topic "Complex treatment of ENT diseases in nonspecific diseases of the bronchi and lungs" (curated by Prof. AI Alimov and Prof. MS Pluzhnikov).

Norbaev Z.K. conducted a scientific research on the topic "Morphological and morphometric changes in the mucous membrane of the nasal cavity in chronic hypertrophic rhinitis in adulthood" (supervisor prof. Kosimkhodzhaev I.K.)

In the department of otorhinolaryngology, the staff published 35 methodological manuals and introduced into practice the results of scientific research, of which 10 - nationally and 14 - locally. The staff of the department published 10 monographs and textbooks for 5 students. The staff of the department has published more than 500 scientific articles in local and foreign journals, more than 60 rationalization proposals have been given. Every year, on the initiative of the department staff, a scientific and practical conference "Actual problems of otorhinolaryngology" is held. Currently at the department assistants Usmanova N.A., Tadjibaev A.A., Khusanov Sh.R., A.O.Ulmasov, H. Saliokhunova carry out scientific research for the defense of dissertations as independent researchers. Each employee regularly participates with his scientific developments in lectures at regional and republican scientific and practical councils.
