

The Department of Traumatology, Orthopedics and Neurosurgery. History

The Department of Traumatology, Orthopedics and Neurosurgery was established in 1967 as an independent department by the order of the Ministry of Health of the former Soviet Union as an associate professor of the Department of Hospital Surgery.

MD Dustmurodov, MD, Ph.D., under the supervision of Professor GS Yumashev, Ph.D.

Special attention is paid to the creation of the material and technical base of the department and replenishment with qualified personnel. At the initiative of the late Rector of the Institute, Professor Yu.O. Otabekov, the Department of Traumatology of the Institute of Traumatology of the Institute of Traumatology of the 1st MMI named after IM Sechenov became closely connected with the Department of Traumatology and began to become a paternity department. Since 1968, the department began to work with qualified scientific personnel, including candidates of medical sciences: HT Tukhtasinov, GI Ibrokhimov. The 40-bed traumatology department of the Shuyilar Civil Clinical Hospital is the base of the department. Later, the Department of Traumatology was expanded to 50 seats and a new 30-seat Department of Surgery was established.

In 1974-1975, the scientific development of the department intensified, and the success of the candidate's dissertation as a scientific product. First MH Khasanov, then GI Ibrohimov, NM Kurbanov, and later the staff was elected associate professor of the department.

EI Alimov, KM Mahmudova, BF Sharipov, MA Fedoseeva, JT Tukhtaev were elected as assistant professors of the department. In 1980-1984 the department was headed by Ph.D. Professor M.A. Fedoseeva. M.A. Fedoseeva defended her doctoral dissertation in 1980 under the guidance of Professor GS Yumashev.

1980-1990 yillarorasi doka kafedra ilmiy xayotida 3 doktorlik dissertatsiyalari yoqlagan. 1984 yili N.M. Kurbanov "Umurtqapog'onasini asoratlashlarini jarroxlik usulibildan davolash" mavzusida doktorlik dissertatsiyasini yoqlagan. Ilmiy raxbari professor G.S. Yumashev. 1989 yili R.Yu. Osmanov "Chaqaloqlardachanoqbo'gimichiqqlarni davolashni patogenetika soslash" mavzusida doktorlik dissertatsiyasini yoqlagan.

Associate Professor of the department H.T. Tukhtasinov has been active in the community of the institute for many years and worked as a deputy dean of the Faculty of Medicine.

From 1985 to 2002, Doctor of Medical Sciences, Professor NM Kurbanov was the head of the department.

At the initiative of NM Kurbanov in 1983, the Department of Neurosurgery was established in the clinics of the Andijan State Medical Institute and is currently operating. Under the leadership of NM Kurbanov, one of the first in the country, special attention is paid to the development of vertebral surgery.

SCIENTIFIC POWER OF THE DEPARTMENT

Under the guidance of Professor NM Kurbanov prepared 7 candidates of sciences: KTKhudoyberdiev, N.Yu.Mirzayuldashev, OKAbdukhaliqov, BMIIsakov, AGKarimov, BNDavlatov and 3 doctors of sciences: KTKhudoyberdiev (defense - 1999) OKAbdukholikov (1999) JMMamanazarovs (defense - 2000) currently have 2 employees: Associate Professor JTTukhtaev., Ph.D. KA Kuldashiev is working on his doctoral dissertation and 7 of our employees are working on candidate dissertations. Under the guidance of Professor NM Kurbanov, 3 monographs on the pathology of the spine and spinal cord were published and presented to a wide range of medical professionals.

In 1989 and 1999 at the initiative and with the active participation of the department held scientific-practical conferences on "Actual problems of arthrology and vertebrology" with the participation of national and foreign experts.

Professor NM Kurbanov participated in the XI World Congress of Neurosurgeons in Amsterdam, the Netherlands in 1997 and in the Conference of European Neurosurgeons in Hanover, Germany (1998).

According to the order No. 226, the Republican Scientific Center of Vertebrology was established.

Since 2003, he has been working at the department.f.d. Professor KT Khudoiberdiev is in charge.

KT Khudoiberdiev - the main focus is on strengthening the material and technical base of the department, improving the conditions for students, masters and clinical coordinators. The auditoriums and lecture halls located in the bases of the department were renovated. In collaboration with the IRC and the testing center, a new generation of science textbooks was presented to the students. Employees of the department are trained in cooperation with leading research institutes and universities of the Republic. In cooperation with the departments of the Institute in 2004-2019 prepared 4 candidate and 1 doctoral dissertation. In 2010-2016, a scientific-practical conference on current issues of traumatology and orthopedics and neurosurgery was held. 3 employees (Mamajonov K.H. in Kazan for 1 month in 2017 of the Russian Federation, Kodirov AA and Mamajonov B.C. in Novosibirsk of the Russian Federation), in 2018 the assistant of the departmentTursunov K.K. UzNIITOdamalakaoschiribkaytdi.

The staff of the department:

Kuldashiev K.A. Bosch is currently pursuing a doctoral dissertation on the prevention of myocardial infarction.

Mamadaliev A.B. and Kodirov A.A.

Phdnomzodlikdissertaciyasiniyoklaschgakirischischgan.

REFERENCES, METHODOLOGICAL MANUALS PREPARED BY THE DEPARTMENT

In 2012, he held a national scientific and practical conference on "Current issues of traumatology and arthrology." 2012-2013-2015. He received patents for "3" inventions from the Property Agency of the Republic of Uzbekistan. Published 6 textbooks, 1 monograph.

From 2010 to 2018 - in traumatology introduced the method of "blocking osteosynthesis" from modern methods of treatment of tubular fractures, which is successfully used by the staff of the department. With the help of TOITI, a leading method in the country, the practice of "endoprosthesis" of joints has been launched. In 2016, a national scientific-practical conference on the topical issues of "Neurosurgery (spinal pathology)" was held in Andijan. At present, all the methods of treatment of Spinal Surgery are implemented in the treatment bases of the department.

In 2019, 1 monograph, 3 textbooks and a number of articles (there should be a "textbook and many articles") were published. On August 10, 2019, Mamajonov B.S. - Defended his dissertation in the field of PhD-medicine.

TODAY'S LIFE OF THE DEPARTMENT

In January 2020, on the Enlightenment and Culture Channel, our teacher N.M. A show dedicated to the memory of Kurbanov was shown. Medical examinations are being held at the Central Polyclinic of the Boz District Medical Association to facilitate treatment and medical examinations of the population.

An animated video about Covid-19 was shown online, showing the sequence of measures taken by the population to prevent it.

The learning process was conducted online and online lectures were presented to the students. He took an active part in the online conference held at our institute on June 11-12, 2020 and presented 2 reports from the Russian Federation and 3 from leading scientists of the Republic. Employees of the department participated with 16 theses and 5 reports.

Based on the competition announced by the Innovation Center of the Republic, we submitted a project for 1 innovation grant. 2 monographs, 6 journal articles were published. 1 doctoral dissertation was discussed by the jury. At present, the scientific potential of the department is 50%.

Chairperson, Professor K.T. Xudayberdiyev
