## HISTORY OF THE DEPARTMENT OF PROPAEDEUTICS OF INTERNAL DISEASES

*“Where there is no science and research  
no development, rise, and in general,  
no industry has a future ”  
Sh.M.Mirziyoev*

The Department of Propaedeutics of Internal diseases was established in 1957 in the Department of Internal Medicine of the Regional Clinical Hospital for 120 beds. Candidate of medical sciences V. A. Arustamyan was appointed as a chairman.

Candidate of Medical Sciences AABoltaboev, assistants OG Morozova, EN Konstantinov and NA Alimova worked at the department.

At that time, associate professor of Samarkand State Medical Institute A.Ya. Malyar gave visual lectures to students for 2 weeks. After that, the reports were delivered by the head of the department, c.m.s VA Arustamyan began to study.

From 1958 to 1959 the department was headed by Professor GM Efendiev. He was also the head of the department of optional therapy.

1958 Since August 2013, Associate Professor BI Soybel has been appointed head of the department. At that time, the department operated in the 1st city hospital for 60 beds. From year to year the number of members of the department began to increase. Associate Professor Sh.K.Botirov, assistants SS Medvedeva, ZIKhasanova joined the department.

СОЙБЕЛЬ Б. И.

From 1961 to 1972 the department began to work in the 60-bed department of internal medicine of the city railway hospital. Here the assistants to the department are L.X. Ilyasov, I.A.Ali-Zade, A.D.Skvortsova, G.N.Yushina, S.Yu.Tursunov, Z.S.Velmizova were hired.

During these years, the department has conducted extensive research in cardiology. As a result, the head of the department, associate professor BI Soybel, PhD and assistants EN Konstantinov, ZI Khasanova, S.Yu. Tursunov defended their dissertations.

In 1972-1975 the department was headed by Professor IF Fatkhullaev. At that time, the department was located in the 120-bed department of internal

medicine of the regional hospital.

In 1975, the head of the department was appointed associate professor S.Yu. Tursunov. At that time, the department had 2 associate professors, 14 assistants, 4 clinical residents and 3 preparators.

From 1968 to 1975 the department was headed by Associate Professor ZI Khasanova and from 1975 to 1983 Associate Professor OS Saloxiddinov.

During these years, the department has done a lot of positive work to improve the educational process. In particular, each classroom is divided into human systems (respiratory, cardiovascular, renal, hepatic, etc.), which are equipped with the necessary tables, posters and equipment, technical means for these systems. Numerous methodological manuals have been created, educational-methodical conferences have been held regularly.

Scientific work began under the heading "Physiology and pathology of the cardiovascular system." Sufficient conditions have been created for scientific work. Major cities such as Moscow, Leningrad, Kiev, Novosibirsk, and Bishkek began to cooperate with cardiologists. Epidemiological and prophylactic work is established. The Scientific Center of Cardiology in Moscow is a methodological center for scientific work.

Professor of the department  
O.S. Saloxiddinov

Until 1982, 1 doctoral (S.Yu.Tursunov) and 6 candidate (O.S.Saloxiddinov, B.M.Mahmudov, K.J.Khusainov, N.S.Mamasoliev, A.F.Nabieva) dissertations were defended at the department. made. Published 3 monographs, more than 250 scientific articles.

In 1983, in connection with the appointment of Professor S.Yu. Tursunov as

head of the Department of Internal Medicine, the department was headed by Associate Professor OS Saloxiddinov. At that time, the department had associate professors BMMahmudov and GNYushina, as well as assistants MNNosirov, RAEnileva, IIIsmailov, MNNigmatjonova.

Associate Professor OS Saloxiddinov headed the department until September 1987 and moved to the position of senior researcher to continue his doctoral dissertation.

From 1987 to 1988 the department was temporarily headed by Associate Professor BM Mahmudov. In 1988, the department was headed by Associate Professor NS Mamasoliev, who successfully defended his doctoral dissertation. In 1997, when Professor NS Mamasoliev was appointed head of the Department of General Practitioner, the department was again headed by Professor of the Republic of Uzbekistan, a member of the New York Academy of Sciences, Professor S.Yu. Tursunov.

In recent years, Professor S.Yu.Tursunov, who has been working as a professor of the department. died on January 9, 2021.

***Three generations of relay: Professor S. Yu.Tursunov, professor N.S.Mamasoliev, associate professor R.N. Yuldashev.***

Since 2012, the department is headed by Candidate of Medical Sciences, Associate Professor RN Yuldashev.

The department has 1 professor ( O.S Saloxiddinov), 4 associate professors

(N.D. Kasimova, S.Gartikova, N.R. Yuldashev., Dauletboyev B.K.), candidates of medical sciences I.I. Ismailov Z.M.Niyozov, as well as senior teacher ZV Yunusova, assistants (Primkulova GN, Isakova DZ, Kityan SA, Valieva ZS, Ataxanova NS., Teshaboyev M.G. Musashaykhov U.X., Yusupova M.Sh., Badalbaeva N.M., Qaraboeva F.U., Khamidov D.A., Maksudov O.M., Toshmatova G.A., Abdurahmonov M.G., Kholikova DS, Ashuralieva ND, Ibragimov BN, Ganieva Z., Tursunov J.X.) and 16 clinical residents. Students of the department of treatment, pediatrics, dentistry, medical prophylaxis and medical pedagogy study at the department of 2-3 levels and students of the faculty of pediatrics of 3-4 levels.

Employees of the department are constantly looking for ways to improve the educational process and actively introduce new learning technologies in the educational process. Every year at least 6-8 new textbooks are created. 2 textbooks on internal medicine were created.

The textbook on propaedeutics of internal diseases, created by the professor of the department, co-authors S.Yu. Tursunov, serves as a guide for students of all medical institutes of the Republic. New, modern technical means (video binary, computer) are widely used in the educational process.

Members of the department are consistently working in the field of spirituality and enlightenment. He has published pamphlets and hundreds of articles on spirituality. They are diligent in making the Days of Spirituality fun. Great attention is paid to the educational side in lectures and practical classes.

One of the main tasks of the staff of the department is the education of a harmoniously developed generation, training of scientific personnel. More than 20 doctoral and 50 candidate dissertations have been defended at the Central Asian Scientific School of Preventive Cardiology, founded by Professor S.Yu. Tursunov. Over the years, much progress has been made in scientific research.

Chair holder R.N. At the initiative of Yuldashev, the department maintains scientific contacts with a number of foreign scientists (Ukraine, Russian Federation, Poland, India, Kyrgyzstan and South Korea), and visits to the department are organized. A number of employees of the department are returning to the centers where they work, online conferences are being held. Scientific articles are published in prestigious journals. Every year, the staff of the department prepares 2-3 textbooks, monographs and dozens of teaching aids, conducts practical training on the basis of new educational technologies.

At the department, 7 young assistants conduct research on topical issues.
