

DEPARTMENT OF REHABILITOLOGY, SPORT MEDICINE AND PHYSICAL EDUCATION

1959, at the Department of Physical Education, there was a teaching of subjects of medical control and exercise therapy. Those years the head of the department was A. Nogai. In 1962, under the guidance of Associate Professor Reznikov, it became a separate course. 1969-1973 the course was run by A.S. Litvak. Since 1973, the course was led by Professor A.Zh. Zhuraev. In 1975, the course was transferred to the physiotherapy department located in the AGMI clinic. Under the leadership of Azim Zhuraevich in 1976 due to the increase in hours, the course was announced as a department. In 1985, in the AGMI clinic, on a sanatorium type, the balneophysiotherapy department was created. The sanatorium could treat 200 patients at one time. The base of the department was carried out to the department of balneophysiotherapy. After that, the process and quality of teaching practical training improved a lot. Every method proposed or otherwise invented was applied directly, and the result was obvious to us and the students. It helps students gain more reliable and accurate knowledge while deepening their experience and learning experience. This will increase the interest of students and the public in our department.

Research, treatment and practical application of new treatments are evolving in their own way. In 2005, the department was renamed into the department of physical culture, health, exercise therapy, VC and physiotherapy. The department was headed by associate professor Mukhtarov O.A. Since 2015, the magistracy in the specialty 5A510127-Sports medicine has been taught as part of the training of scientific and pedagogical personnel. In 2017, the department will be renamed into "Rehabilitation and Physical Education", and from 2020 - into "Rehabilitation, Sports Medicine and Physical Education". Since January 2018, the department is headed by Butaboev M.T.

Since the creation of our department, 2 doctoral studies, 6 candidates and 50 clinical residents, 4 undergraduates have completed their studies and are successfully working in various fields.

The main research work of the department is to study the impact of non-drug therapy on patients with various diseases.

Basic doctoral student of the department (PhD) Tokhtiev Zh.B. conducts research on the topic "Morphofunctional state and dynamics of physical training of athletes involved in the national sport of kurash."

In the future, we plan to continue international research work, improve and develop new methods..

DEPARTMENT STAFF

**Head of the Department: Ph. D. Associate Professor.
Butaboyev Mahmudjon Tuxliboyevich
Telephone: +998934155505**

**Senior lecturer:
Minavarov Rasuljon Anvarovich**

Senior lecturer:
Soliyev Ilhomjon Maxammadjonovich

Assistant:
Utanov Zafar Muhammadovich

Assistant:

Isakov Qobiljon Komiljonovich

Assistant:

Kosimov Islombek Ulugbekovich
