## **MISSIONS OF THE FACULTY OF GENERAL MEDICINE**

The mission of the Faculty of General Medicine of ASMI is to train highly qualified doctors in Uzbekistan and at the global level and improve the quality of life in the healthcare sector.

To fulfill this mission, the Faculty of General Medicine offers undergraduate, graduate, clinical residency and doctoral programs that meet international educational standards for talented students who are on par with graduates of any world-class university. Students of the Faculty of General Medicine are able to demonstrate leadership qualities, talents, language skills and achievements at a high level.

From the formation of this Mission, the basic values that set practical tasks for the institution's activities are derived. All staff of the Faculty of General Medicine demonstrate respect, openness, honesty, care about the quality of education and show intolerance towards manifestations of nepotism, corruption and discrimination.

The 2023-2030 Strategic Plan is based on an in-depth analysis of data collected over the past three years by the Department of Quality Assurance and Institutional Research, the Department of Student Affairs and the four departments. This information helped the Strategic Planning Committee formulate the Institute's four goals for the next 6 years.

The main objective of the institute is to carry out educational and research work. When considering most of the information received from various departments and organizations, the main attention was paid to information related to the three areas of activity of the institute. Data analysis led to the following observations:

In the strategic plan for 2023-2030, the teacher curriculum defines the preparation of students with the following qualities:

- Students who are responsible, respectful and have leadership qualities;
- Good knowledge of English in the medical field, which allows to successfully occupy leadership positions in the international community;
- Has the ability to think critically and analytically;
- Successful graduates in their field;
- Opportunity to find a good job or continue education.

- One of the areas that the Faculty of General Medicine will focus on this academic year is the identification and evaluation of educational outcomes.
